Kymaera's first album, financed by George Michael's publishers, Dick Leahy, and originally released in 1998. The link is to iTunes where you can download the album for £7.99 or individual tracks for 79 pence. Actual CDs are now collector's items.

Pony Canyon's version released recently in South Korea. The link is to Yes Asia.

Rio Moods was commissioned by Michael Neidus at MCI now part of the Demon Group to commemorate the death of Antonio Carlos Jobim. It was also released in 1998 and just beat the George Michael into the shops though the latter was mostly recorded early in 1997. This is also its iTunes page though Demon still offer it for download.

A rather good far Eastern version of the album, this is what Lim Ti Leong thought:

'I bought this Album in Singapore.... This CD Album cover is attractive .... with 'Flower Power' design imprinted on it.

I was hesitating to purchase this album without trying to hear ... so I got someone to play the album .... The first track was was very impressive to hear ... the 'Desafinado' was played off-key by a saxophone - WOW ! S-M-A-S-H-I-N-G ... beautifully sound .... exotic...sounds "naughty" and "playful" ....other tracks were also impressive ..... the combination and solo play of flute, piano, acoustic guitar .... latino musics replayed much like the 1960s .....

Impressive !!!! This album has been digitally remastered (Audiophile Recording) - an impressive sound performance .... you won't be disappointed !!!!'

Careless Whispers was also commissioned by Michael Neidus at MCI. We had to change the name to Jazzamba as it was a bit close to the original George Michael release date. The link is to CD Universe but it may no longer be available.
